## Calendar.

- May 31—Dance in Stony Plain.
- June 4—Baseball season opens at Stony.
- 5—Athletic Ass'n meets.
- 6—Anglo-Catholic meets.
- 8 to 9—Midwifery Demonstration in Ducholke Hall.
- 7—U. F. A. Local meets.
- 10—Women's Institute meet.
- 13—Dance at Trautman's barn at Holborn.
- 14—H. J. B. Boyle and H. C. R. Mitchell will give addresses in Stony.
- 17 to 20—Chautauqua.
- 18—Community Picnic, Spruce Grove.

## For the New Kirche.

The building committee for the new Lutheran Church in Stony Plain held a meeting Saturday evening and opened tenders; two tenders had been put in, and the contract was awarded to G. Gitzel at \$825; the other tender in was for \$875. The excavating will be done by volunteer work. Construction must commence by June 10 and the building be completed by August 1st. Armbruster & Hennig will supply the required lumber at carpenter price.

## News from the Grove.

Spruce Grove Community League is holding another meeting tonight, to complete arrangements for the big community picnic to be held at the Grove Wednesday June 12th. All kinds of games—baseball, football, basketball, horse races. The famous Golden Spike band will be on the grounds during the day; the whole affair to wind up with a big dance in the new dance pavilion to be erected. Martin's Orchestra will attend the dance.

## DANCE 1

W. TRAUTMAN BARN,  
AT HOLBORN.  
FRIDAY, JUNE 13.  
GOOD MUSIC.  
Ladies, Please Bring Baskets.

## Sporting Notes.

The ball game on the holiday proved a win for the local team, against the Edmonton aggregation, Stony apparently was after a big score, as they kept piling up the runs even after they had the game cinched. The visitors are a bunch of good all round batters, and played practically an errorless game, but could not withstand the onslaught of the local sluggers who played havoc with the balls of the two visiting pitchers. Owing to this slugging, the Edmonton bunch had an uphill fight all the way, the final score being: Stony, 14 runs, North Edmonton 5. Gordie Graden was there with his home run wallop, as usual, bringing him 7 men. The local battery, Loeblich and Steckle, did excellent service; Loeblich being relieved by Chesser in the ninth inning. Following is the local line-up: Simmons 1b, Laird 2b, Zucht 3b, Chesser ss, Oatway rf, Moyer lf, G. Graden cf, H. Loeblich p, Steckle c. Gus Zucht acted as umpire.

The girls' basketball team from Martin's school, at the Grove, played a return match on Thursday last with the team from the local school, with the result that the visitors lost by 1 point, the score being 12 to 11. Three auto loads of routers came up with the players.

Secretary Henry Sinner of the Football Club is planning a schedule for the season.

Stony's ball team plays in Evansburg next Sunday.

The Mashroom Hunters are organising for the season, and will hold a meeting at the Royal on Saturday after the rummy game.

Shoppers are reminded the Wednesday half-holiday in Stony Plain commences Wednesday next, June the 4th.

## LOCAL NEWS.

Miss Jean Maxwell and Miss Kate Ballow, Edmonton, were holiday visitors with Miss Mabelle Clarke.

Henry Goebl left Monday for Leaman.

Mr S. G. Simmons, formerly of Stony Plain, spent the holiday here.

After a lingering illness, the wife of Ray E. Eberhardt passed away yesterday morning. Deceased was an old resident of Stony Plain district, and was highly respected. The funeral will take place on the arrival of Amil and Karl Eberhardt from St. Paul, Minn.

Mr and Mrs. M. Vogt, of Strathcona, visited in Stony on the holiday with Mrs. G. W. Shreeves.

Mrs. L. J. Arsenault, of Big Valley, was visiting in Stony Plain over the week end.

Mrs. Wood is attending the annual convention of Women's Institutes this week, as delegate from Stony Plain branch.

Mr. Breitkreutz motored a party of friends to Leduc on Saturday.

The infant son of Mr and Mrs. Fred Gabel, of Spruce Grove, died on Tuesday.

Officer Smith was in attendance this week at the Criminal Court in Edmonton, as a witness in the attempted murder trial of M. Panchashyn formerly a miner working in a Coalspur mine.

The W.I. will hold its June meeting on June 10, at the home of Mrs. G. Donaldson. The meeting is at 3.15, and members are urgently requested to be on time.

No. Belinda, the Town's Ponder Brawl, is not in force yet; but it would be advisable to keep your cow off a Councilor's lawn.

The annual meeting of the Stony Plain Amateur Athletic Sports Association will be held in the Town Hall Thursday June 5 at 8.30 p.m. to receive the report and accounts for the past year and to make arrangements for the Dominion Day sports.—Jas. Malloch, Hon. Secy.

Practically all the members of the Rifle Club participated in the big shoot at the Butte on the holiday. Practice began about 10 a.m. and continued till the evening. Owing to the variable wind, big scores seemed out of the question, although Officer J. Smith, Dr. Walton, W. Robertson, Geo. Graden, S. C. Elliot and Mord McKinlay made good records.

## A Great National Project

The people of Western Canada are strongly in favor of the completion of the Hudson's Bay Railway and the opening of what has been termed the route "over the roof of the world" for prairie grown grain, cattle and other products to the markets of Great Britain. Millions of dollars have already been spent and a few millions more will carry the rails to tidewater. But while Western people favor the completion of the road and proving the feasibility and practicability of the route, their voices have been largely inarticulate in making their demand effective in the face of strong Eastern opposition.

Steps are now being taken through the organization of the "On-to-the-Bay" Association, with branches in every section of the West, to organize existing public opinion that its voice may be heard insistently and loud, and pressure brought to bear on the Federal Parliament to vote the necessary appropriation for the completion of the railway. There should not be the slightest hesitation on the part of prairie dwellers to join the "On-to-the-Bay" Association; on the contrary, their support should be unanimous and enthusiastic.

Objection is raised in the East that the Hudson's Bay route is dangerous; but the St. Lawrence route to Montreal is notoriously one of the most difficult and dangerous in the world, yet it has been made a success until Montreal is now one of the great ports of the world. It is further objected that continual dredging at the Bay ports will be necessary; but everybody knows that this is equally true in the St. Lawrence. It is argued by opponents that ice in the Hudson's Straits will prove an insurmountable obstacle; but the ice is just as big off the Straits of Belle Isle and Cape Race, and in addition the Lower St. Lawrence route suffers from fogs which make the ice doubly dangerous, where as the Hudson's Bay is free from fogs. Finally, it is objected that the ports on the Bay are not natural harbors; but many of the great harbors of the world are not so by nature, including Montreal and Dover.

With difficulties to be overcome no greater than those contended against successfully in making Montreal a great port, there is the decided advantage from the Western standpoint that the Hudson's Bay route from the heart of the wheat growing prairies to Liverpool is 1,000 miles shorter than it is by way of Montreal, which means the saving of an expensive rail haul of that distance.

Only ninety-two miles of steel remain to be laid to bring the Hudson's Bay railway to the sea. A well organized and insistent demand by the ever-increasing political power of the West can bring about the realization of the long cherished ambition of the prairies for their own outlet to the sea and the shortest of all routes to the markets of the world. This is not a political question in a partisan sense. Every political party in Canada has declared in favor of the building the railway. It can never be made a party football as far as Western people are concerned, but the political group which proceeds to fulfill its promise to the West regarding this vitally important matter is bound to gain substantial support as a result.

However, it is not the fortunes of political parties which are paramount at stake; it is the economic welfare and prosperity of the whole of Western Canada that is involved, and bound up with the prosperity and development of the West is the future of the whole Dominion. It is not party loyalty but national patriotism which urges immediate action; it is not sectional interests but national interests which call for Parliament's consideration without further delay.

While Eastern opposition is publicly based on objections to the feasibility of the Hudson's Bay route, and through a professed desire not to squander public money on a scheme which they predict will end in failure, the all too apparent fact is that this opposition arises through selfish fears that the route will prove such a success as to divert the enormous traffic now flowing from the West through the Great Lakes to Montreal in summer and by the all-rail haul to the Atlantic seaports in winter.

That this is the real reason is to some extent proved by the fact that the Ontario Government is steadily extending its own Northern Ontario railway towards its fixed terminus on James Bay, the southernmost part of Hudson's Bay. Ontario does not propose to be caught napping with the opening of the Hudson's Bay route, and the completion of the Western road to the Bay would almost certainly be quickly followed by the rushing of the Ontario line to James Bay.

And whatever diversion of Western traffic from Eastern ports might result would be more than offset by the increased prosperity, settlement and development of Western Canada, resulting in a largely increased market for Eastern goods throughout the whole prairie country.

Let it be repeated, therefore, that the Hudson's Bay railway is not solely a sectional policy designed to benefit the West, and the West only. Primarily it is designed to do that, but in its ultimate effects it will benefit all Canada, and promote the interests of both West and East. It is a great national undertaking which has been too long delayed. A frank acceptance of this fact by opposing interests in the East would do much to better relations between the two great geographical divisions of the Dominion.

## "Headaches, Bilious Spells, Are Now All Gone"

Mrs. John Ireland, Nobleton, Ont., writes:

"I was a great sufferer from severe headaches and bilious spells. I tried a number of remedies without obtaining any benefit until I was advised to use Dr. Chase's Kidney-Liver Pills. These completely relieved me, and made me feel like a new person. I am very grateful to Dr. Chase's Medicines for what they have done for me, and you may use my letter for the benefit of others."

**Dr. Chase's Kidney-Liver Pills**  
25 cts. a box of 35 pills, Edmondson, Bates & Co., Ltd., Toronto

## Devises System For Secret Radio Messages

United States Inventor Will Demonstrate Device in London

John Hay's Hammond, Jr., the United States inventor, has left Rome for London to demonstrate his latest device in radio transmission. He has entered into a contract with the Italian Government for a number of transmitting and receiving sets.

The system permits of secrecy in radio transmission and enables each station to send more than one message simultaneously on the same wave length. Great utility in wartime is claimed for it because it makes use of certain combinations of wave lengths which must be known before a message can be picked up. In commercial use it would permit broadcasting stations to charge a fee for listening in on their programmes.

## Old Reel Films Useful

Coating Yields 112 Ounces of Silver To Ton

What becomes of the millions of miles of old "movie" films which have served their time in amusing the public? When a film has been thrown aside as "junk" it is cleaned by a special process, which removes the chemical coating. This coating is capable of yielding silver at the rate of 112 ounces to the ton. The cleaned celluloid strips sometimes pass into the hands of shoe manufacturers, and a considerable portion of the "patent leather" tips on shoes are the result. So you may at the present time be wearing on your feet a bit of film which has once held the charming curls of Mary Pickford or the laughter-provoking face of Charlie Chaplin.

## 2 Years' Backache Subdued by "Nervine"

"Backache was the bane of my life, and for two years I was so lame as to be unfit for work," writes E. S. Sloane, from Georgetown, Wile in Smith Bros' Drug Store, I heard of Nervine being a wonderful pain-destroyer, so I decided to try Nervine. Thanks to Nervine, my two-years' backache was rubbed away, and today I am perfectly well."

All those who suffer from weak, aching backs, those whose muscles are stiff, whose joints are swollen, let them try Nervine—the liniment that never fails. 50c at all dealers.

## Beyond Repair

S. S. Teacher—"Willie, how many commandments are there?"

Willie—"Ten." Teacher—"That's right. If you broke one, what would happen?" Willie—"There would be nine left."

## CHILDHOOD INDIGESTION

Nothing is more common in childhood than indigestion. Nothing is more dangerous to proper growth, more weakening to the constitution or more likely to pave the way to dangerous disease. Nearly ten-tenths of all the minor ills of childhood have their root in indigestion. There is no need for little ones to equal Baby's Own Tablets in relieving this trouble. They have proved of benefit in thousands of homes. Concerning them Mrs. Jos. Lunette, Immaculate Conception, Que., writes: "My baby was a great sufferer from indigestion, but the Tablets soon set her right, and now I would not be without them." Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

## New Chinese Race Found

Have Curly Hair and Keep No Account Of Their Age

Blond Chinese with curly yellow hair and women who keep no account of their ages have been found by an expedition of the National Geographic Society sent into the unexplored Kansu region of Asia.

Reporting to the Society's headquarters at Washington, Frederick R. Wooten, leader of the expedition, told of a trip on the Yellow River on a raft made of 72 yak skins. The "Togans," meaning earth men, were the most interesting people encountered, he said, and it was among these that the question of age had no importance. He adds that the unmarried women were from 20 to 30 breeds of hair.

## Spanish King Accepts Poultry From Dominion

Pen of White Leghorns Exhibited By Canada At Barcelona

King Alfonso of Spain, who, with the Queen and Crown Prince visited the Canadian exhibits at the World's Poultry Congress at Barcelona, Spain, accepted as a gift from the Dominion a pen of White Leghorns, according to cable advice received by the department of agriculture, Ottawa.

The 1927 World's Poultry Congress will be held in Ottawa, the cable said. This was decided at a meeting of the members of the congress.

Simple and Sure.—Dr. Thomas' Electric Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young or old.

Build Large Lumber Mill  
Granville Island, Vancouver, is to have another addition to its already many and varied industries, work having been started on the erection of a lumber mill there for K. M. McNeil. Approximately \$300,000 of foreign capital has been invested and with the installation of the mill, it is intended to handle both hard and soft woods.

No matter how deep-rooted the corn may be, it must yield to Holloway's Corn Remover if used as directed.

Okanagan Onions  
Approximately 4,000 tons of onions were grown in the Okanagan during the past season, principally around Vernon, Kelowna and Armstrong. The crop was a fair one and the prices paid such as returned a fair profit to the growers.

Minard's Liniment for Distemper

Take Up Irrigated Land  
Besides the Hollanders who have already arrived to take up land in the irrigated Lechbridge district, another party of 64 members from Britain have also just located in the area.

## Commends League of Nations

Has Much to Its Credit Says Canada's War Premier

Sir Robert Borden, Canada's war premier, while addressing the Canadian Club, Hamilton, on the work of the League of Nations, announced that he had no intention of returning to public life.

After reciting the events which led up to the formation of the League of Nations, Sir Robert said: "I hear criticism now and then of the League, but such provides a system whereby the nations of the world can be called together for a conference. It has more to its credit than any one of us can realize. I need not refer to the fact that it has averted war five times in the last four years."

"I commend it to you, because it is teaching the nations of the world the habit of coming together for co-operation."

Miller's Worm Powders not only make the infantile system untenable for worms, but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other internal disorders that the worms create. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

Grain From Grand Prairie  
Shipments of grain from the Grande Prairie and Peace River districts over the Edmonton, Duvagan and British Columbia Railway during the past season have totalled 5,471,000 bushels of wheat and 1,700,500 bushels of other grains.

As a vermicide an excellent preparation is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

Sugar Exports  
Canadian refined sugar, valued at \$2,099,558, was exported during the month of March. In March, 1925, the exportation was valued at \$1,681,869. During the twelve months ended March, 1924, 115,729,595 pounds were exported.

## CHILDREN CRY FOR "CASTORIA"

A Harmless Substitute for Castor Oil, Paregoric, Drops and Soothing Syrups—No Narcotics!

Mother! Fletcher's Castoria has been in use for over 30 years to relieve babies and children of Constipation, Flatulency, Wind, Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep without opiates. The genuine bears signature

Charles H. Fletcher

## Assimilation Of New Canadians A Question That Should Receive The Most Serious Consideration

The question of the assimilation of the growing number of new peoples whom Canada is assimilating is receiving, it is most important one, for unless the newcomer is kindly welcomed, given a helping hand, encouraged and made to feel that his presence is considered an asset by this country, he will, as United States immigration figures would indicate, be eventually drawn away to the great republic to the south of us.

While it is clear that the movement of our trades population to the United States, particularly at times when wages are higher and work more plentiful (for no amount of patriotism or sentiment will prevent a man from going where he can better his condition), will always continue, the excessive emigration of last year, caused by temporary conditions which, in time, will right themselves, and they do not apply to any extent to our agricultural population. The United States, itself, has admitted, after a very thorough recent inquiry, that the grain produced in Canada at lower cost, is of higher quality and enjoys lower transportation rates, and in view of these facts, and the further fact that some disheartened Canadian farmers abandoned Western Canada last year, it is high time that this question of assimilation be thoroughly understood by the general public in whose hands, largely, lies the power to remedy it.

Those who have been strangers in strange lands will remember well what pleasure they welcomed the first friendly overtures made to them by the inhabitants, the encouraging effect it had on them, and the stimulus it gave to their activities and outlook. Those who come to live in this country, no matter of what walk in life, have, more or less, the same general sentiments and feelings we have. They are human, subject to encouraging and discouraging influences, inspired to success or failure by their immediate surroundings and neighbors. It is but a little thing for Canadians to give—a great thing to these new citizens to receive—the welcoming hand of encouragement, and co-operation, which, for the first few months, is so necessary to banish home-sickness, depression and doubt, and instill in their places, confidence, contentment and faith, once in possession of which they will become satisfied, producing citizens, a distinct asset to this country and all who dwell therein—indeed, any other attitude is prejudicial to our best interests and to the development of Canada as a whole.

Among these lines, Col. J. S. Dennis, chief commissioner, Department of Colonization and Development, Canadian Pacific Railway, addressed the Kiwanis Club of Montreal recently upon the occasion of its assimilation week. Instituted by the Immigration committee of that club.

"The work of successfully assimilating colonists," said Col. Dennis, "cannot be accomplished through any one organization, government or private, but must be undertaken as a great national work and participated in by every individual who is interested in the development of Canada. The growth of a proper national spirit and the final solution of the many serious problems that we are faced with, if Canada is to become the nation which nature has certainly given us the opportunity of becoming, can only be accomplished by united effort on the part of those calling themselves Canadians who have the proper realization of the responsibility attaching to that name."

**Best Sugar Factory For Alberta**  
Final decision on plans to establish a best sugar factory in Alberta will, it is reported, be made this summer by the Utah-Idaho Beet Sugar Company, whose officials are expected to visit Lethbridge district shortly. It is stated that farmers in the Magrath district plan to seed more than 1,000 acres to sugar beets this year.

**Stuck**  
Druggist—If you want the empty bottle I will have to charge you 10 cents, but if you want anything in it you can have the bottle free of charge.  
Customer—That's fair enough. Put a cork.

W. N. U. 1529

## Excellent Paper Made From Western Straw

**Samples Produced By Swedish Process Show Great Possibilities**  
Tests made by the forest products laboratories of the forestry branch of the department of the interior, Ottawa, show that an excellent grade of paper can be made from western wheat and barley straw.

Howard Stutchbury, trade commissioner for Alberta, has exhibited samples of kraft paper which had been produced in an experimental way at the Montreal laboratories of the forestry branch and the report covering the experiments is satisfactory. The Alsché Wilg, a Swedish process, was used in producing the samples. Mr. Stutchbury has, and the report states that "there seems no reason to believe that any operating difficulty would be encountered in adapting it to commercial operation."

The report, which is a preliminary one, and which is prepared by E. P. Cameron of the pulp and paper division, Ottawa, adds: "From the writer's general knowledge of the operating costs of newspaper mills in Eastern Canada and of the conditions under which a well situated and equipped straw paper mill would probably operate in Western Canada, it is his opinion that straw newspaper could be produced by such a plant at a somewhat lower cost than that being produced by the newspaper mills in Eastern Canada from coniferous woods."

There will be further experiments on a larger scale, and Mr. Stutchbury is very hopeful that there is here the germ of what will prove of untold value to the whole of the prairies.

## Salt Producing Industry

**Plant at Fort McMurray to Supply Salt For the Prairies**  
Complete plans have been drawn up by A. von Hammerstein for the establishing of a salt producing industry at Fort McMurray. The plant will be placed at Lake Greathorn, on the boundaries of the McMurray townsite, camps will be erected and the various vats, etc., located in such a manner that the prepared salt can be shipped directly from the factory on to scows in the Clearwater River for transport to the railroad at Waterways and so to the markets on the prairies.

Mr. von Hammerstein has drilling equipment scattered at various points along the Athabasca River, and one of these units will be brought up stream, and will be used to drill down to the salt seams. This is the first stage in the process, and Mr. von Hammerstein and his colleague, Mr. Singleton, have gone to McMurray to make the necessary preparations.

The salt will be brought to the surface in the form of brine, steam being forced into the drilling for this purpose; it will be then run into vats and evaporated by different processes, after which it will be refined and packed. When the establishment of the Alberta Salt Company is operating to capacity it is expected that about twenty men will be employed, it being the intention of the company to cater to the needs of the prairie provinces—Edmonton Bulletin.

**Oil Better Fuel Than Coal**  
Boats large and small are giving up coal as a fuel and turning to oil for that purpose. Less than thirty years ago, very little was known about the use of liquid fuel for steam-raising in the furnaces of marine boilers. The result of the use of oil is seen in the statement made by the testing authorities that from it eighty to eighty-three per cent. of heat value was obtained as against sixty to sixty-five per cent. from coal.

Oil Better Fuel Than Coal  
Boats large and small are giving up coal as a fuel and turning to oil for that purpose. Less than thirty years ago, very little was known about the use of liquid fuel for steam-raising in the furnaces of marine boilers. The result of the use of oil is seen in the statement made by the testing authorities that from it eighty to eighty-three per cent. of heat value was obtained as against sixty to sixty-five per cent. from coal.

## Farm Instruction In Canada Is Important Work Of Federal And Provincial Governments

With an agricultural population amounting to practically one-half of the total for the Dominion, farm instruction constitutes one of the most important phases of the work of the provincial and federal governments. The problem of disseminating information on this vital subject is more or less complex, owing to the immensity of the country and the number of widely scattered farms.

Probably the best distributors of agricultural knowledge are the demonstration farms operated by the Federal Government and located in all provinces of the Dominion. These farms are operated along practical farming lines. A large amount of experimental work is carried on and efforts are made to ascertain the best crops most suitable for the district in which the farm is located. By carrying out these experiments, millions of dollars are annually saved the farmer.

Intensive agricultural training is taken care of in a capable and efficient manner by the large number of agricultural colleges located in the various provinces, chief of which are Macdonald, Quebec, Ontario and Manitoba Agricultural Colleges. The provinces of Saskatchewan and Alberta each has a provincial university. Alberta has six agricultural schools and Ontario one. Canada has some of the finest agricultural institutions in the world, and graduates from these are in demand from many foreign countries.

In the past few years the railways, in conjunction with the provincial and federal governments, have organized and operated "better farming trains" in Alberta, Saskatchewan, Manitoba, Ontario and Quebec. These trains, which are really miniature demonstra-

tion schools, have proven very popular. The trains stop at all important agricultural centres, and lectures are given by experts, as well as many pictures showing the work of the provincial and federal governments. The popularity of these trains may be judged from the fact that in 1922 between 100,000 and 200,000 people visited the Quebec train.

Other media of farm instruction, which have an important influence on Canada's farming community, are the annual exhibitions. It is here that the farmer has an opportunity of seeing all the latest developments along farming lines, as well as viewing the exhibits of grain, stock, poultry and cattle. In Western Canada almost every town and city holds an annual fair, the exhibitions at Calgary, Edmonton, Regina, Saskatoon and Brandon being of an unusually high calibre. The east is also well supplied with fairs, the Canadian National Exhibition at Toronto being the largest annual exposition in the world and the Royal Agricultural Fair and livestock event of the year in Canada.

Where the farmer is unable to attend the annual fair in his district or visit the better farming trains, the governments aid him by the distribution of bulletins on every conceivable agricultural subject. These bulletins, which are distributed free of charge, are written by qualified experts and have been of material aid to the farmer in solving his agricultural problems.

To carry on the work of farm instruction millions of dollars are spent annually by provincial governments. During the fiscal year 1922-23, the Federal Government paid to the provincial governments a total of \$1,068,000, which was distributed by provinces as follows: Ontario, \$236,205; Quebec, \$271,115; Saskatchewan, \$31,728; Nova Scotia, \$31,716; Manitoba, \$77,113; British Columbia, \$69,199; Alberta, \$66,265; New Brunswick, \$64,119; and Prince Edward Island, \$31,748. In addition, the provincial governments expended large sums of money on this work—in many instances the excess of the grant received from the Dominion Government.

Farm instruction, as carried out by the different governments, has enabled the farmer to cultivate his land on a more scientific basis, raise the crops best suited to his particular locality, and thus increase his crop yield and secure for him greater returns on his labor and capital investment. The results of this work are becoming more and more apparent each year, and the splendid agricultural showing made by Canada in recent years is attributable, in a large measure, to the farm instruction programme of the governments.

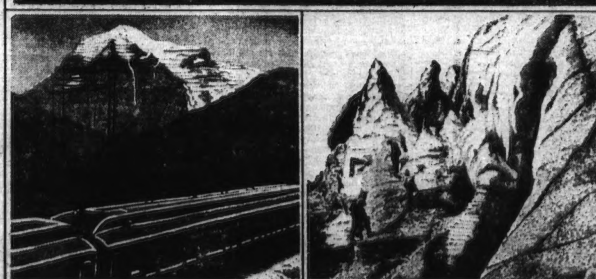

## Raising Motherless Lambs

**Great Care Should Be Observed To Avoid Stunted Growth**

Relative to the raising of pet, or motherless lambs, if great care and discretion are observed in feeding, stunting will be avoided. An ordinary bottle and rubber should be used. In commencing the lambs upon cow's milk, avoid feeding too heavily upon a milk that is very rich, as it may cause indigestion. In the advice of the Sheep and Swine Division of the Dominion Livestock Branch, the milk is more palatable when slightly sweetened with sugar, and it may be necessary to feed with it at intervals, some castor oil to prevent constipation. The first feed of the lamb should be, if possible, colostrum or the milk of the first five days after commencement of the lactation. If this cannot be obtained use castor oil freely until the faeces show yellow. If many lambs are to be raised by hand with nipples attached can be used advantageously, or the more convenient practice of teaching the lambs, like calves, to drink out of a bowl or pail may be followed.

**Whaling Fleet Prepares to Sail**  
Reports from the Pacific whaling grounds are that the prospects promise a better season than last. The whaling fleet is hastily outfitting and will sail shortly. Last year was a good season. The meat pack was sold on the West Coast of Africa, and that market is already calling for more.

## HIGHEST PEAK IN CANADIAN ROCKIES

The Alpine Club of Canada will this year hold its annual camp at the foot of Mount Robson, the highest peak in the Canadian Rockies, which towers 13,668 feet above sea level.

Mount Robson Park, named from the mountain which it surrounds, is a favorite stopping place for tourists from United States points who make the Triangular Tour of the Canadian National Railways, which embraces Vancouver, Jasper and Mount Robson Parks and Prince Rupert with a journey over the inland seas of the

Pacific coast on one of the Canadian National Pacific Coast Steamships. Among other things, Mount Robson can be regarded as the most frequently photographed mountain in the whole of Canada, the Continental Limited of the Canadian National Railways stopping for five minutes at the foot of this monarch of the Rockies in order that tourists who are passing through may secure photographs showing its lofty, snow-capped peak.

Just outside of the boundaries of the National Park is one of the finest big

game hunting grounds of the continent, where black, cinnamon and greyish bear abound and where other big game, such as bighorn mountain sheep and mountain goats are to be found in great numbers. Hundreds of hunters annually make Mount Robson their headquarters for their expeditions into the passes of this region after big game, for here excellent accommodation may be secured either during the summer tourist season or later in the fall when the hunters are out after their quarry.

## A Daughter Of The Ranch

A Story of Romance and Adventure in the Western Pioneer Days

— BY —  
AL. SANDER D. McLEOD  
(Published by Special Arrangement with the Author)

(Continued)

Apart from the fact that their late adventure made them the centre of attraction for the evening, the rhythm of their gliding motions as they circled the floor through the crowd would have, in itself, formed a picture on them. Unconscious of their surroundings and the attention they were attracting, they moved with a grace and ease every moment of the time, and the hand-clapping that followed was for them, as he led her to a seat. This was as embarrassing to them as it was surprising, though she modestly acknowledged the compliment with a smiling bow. To Ronald the enjoyment was so great that he felt he could not participate further in the enjoyment, so he wandered aimlessly around, still living over again the delightful moments of that walk in the shadows. Shortly afterwards, when he had gone out to enjoy the cool breeze of the evening, Ronald overheard a conversation between a group of men that worried him exceedingly. In fact the theme of the conversation came with such a shock that it almost threatened to upset all his future plans and happiness. It, naturally, was a conversation regarding Miss Fraser, and with whom the name of Sgt. Melvin was coupled. What particularly disturbed him was the statement made by one of the men who remarked that he had heard that the sergeant and Miss Fraser were engaged and were to be married soon.

Completely dazed by this news, Ronald turned away from the vicinity of the group and aimlessly directed his steps towards the lake shore. All his interest in the pleasure of the evening seemed to have suddenly vanished. Continuing his walk along the lake shore, a depressing feeling of loneliness overcame him. He felt forsaken and alone. Heedless of the passing time, and conscious of only one irreconcilable thought, and that thought, that the woman he loved was soon to become the wife of another man, he walked on indifferent as to direction and distance, to cool the fever of his agitated emotions. A few moments later, however, his arm with her sweet scented breath fanning his cheek; now she seemed, indeed, beyond his reach, and he felt as if a deep void that interposed an impossible gulf between them.

Coming to a large boulder on the

## DO ALL MY HOUSEWORK

Before I took Lydia E. Pinkham's Vegetable Compound I could hardly get about.

Cobourg, Ont.—"For many years I have had trouble with my nerves and have been in a general state of prostration for some time. I could not do my work half of the time because of the trouble with my nerves. I had heard of Lydia E. Pinkham's Vegetable Compound by friends and decided to try it. It has done me good. I strongly recommend it. Since I have taken it I have been able to do all my own work, and I also know from experience that it has found it good. You can use these facts as a testimonial."—Mrs. ELLIS FLATTERY, Box 70, Cobourg, Ont.

"Why will women continue to suffer so long in more than we can understand, when they can find relief in Lydia E. Pinkham's Vegetable Compound?"

For forty years this good old-fashioned root and herb remedy, which contains no narcotics or harmful drugs, has been the standard remedy for female ills, and has restored the health of thousands of women who have been troubled with such ailments as displacements, inflammation, ulceration, irregularities, etc.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

W. N. O. 1628

lake shore, he sat down to endeavour to collect his thoughts. In his mind the anguine moments there was present with him the dread of this hour that might carry to him the message of his disappointment. When it did break upon him with unexpected suddenness, he had to reconceive his life himself to a fate that would deprive him of even the slight hopes he entertained of winning her. As in his disconsolate disappointment he sat, there passed through his mind with kaleidoscopic vividness the various incidents of their association during the last three days, a time so short, yet so long that it seemed to him he lived every minute of it. There was the first meeting on the trail; then a prisoner in the clasp of the outlaw; how he had to be forgotten posture of attack on her sleeping guard, followed by the ride home; and the pleasant hours since spent together, married only by the unwelcome advent and marked attentions shown to her by Sgt. Melvin. Overpowering the feeling of bitterness for his successful rival was a disconsolate feeling of depression at the thought that the woman he had learned to love was lost to him for ever.

The first streaks of dawn were commencing to illumine the northeastern sky when Ronald rose from his deep contemplation of the trouble that had overtaken him. Now all signs of the regular features and strong countenance when he came there were gone. His dominant will had fought and won its battle against the reckless emotions of his disappointed love. With a strong tread and resolute bearing, he turned about and now retraced his steps along the shore in the direction of the house. In his agitation he had not noticed that the party circled the lake a distance of over two miles, but with strong and rapid strides he regained the house before it was yet daylight.

Walking briskly up the lawn towards the house, he saw Mary on the veranda as he entered. Knowing nothing of the emotions that had racked him for the last two hours, she greeted him with a wave of her hand and a pleasant smile, which he barely returned. He had not been in the house. The last dance, a quadrille, was in progress as he entered, and, standing to one side, he watched it to the end. Mary, noticing his curt acknowledgement of her greeting felt slightly neglected, and followed him into the house. Hurt and puzzled she watched him, as with a somewhat suspicious interest he scrutinized her. He seemed to be following the dance. Her keen intuition apprised her of a marked change in her attitude towards her. With a troubled look she watched him scarcely taking any notice of the direct intentions of Sgt. Melvin, who with his usual urbanity, was at the time devoting himself to her entirely. Joyfully the merry dancers responded to the suggestion of the lively air of the music played by the industrious fiddler. Merrily they glided through the evolutions of the waltz, and the nasal swing of the calls of the self-conscious, much be-haired floor master, till with an extra twang he sang out the last call of, "promenade to your seats."

The dance was over. The assembled guests prepared for departure. It was by now broad daylight. The first rays of the morning sun were commencing to beam on the green tree tops that crowned the summits of the surrounding hills, though the still cast their sombre shadows over the valleys beyond. Welcoming the dawn of the morning, there arose the many voiced choruses of the myriads of the winged denizens of the air, and the low, mellow notes struck harmonious chords in the hearts of the human revellers of the night. A happy note was suggested by discordant notes of the querulous loon, whose occasional strident wails arose as in rebuke of the joyous welcome that greeted the rising sun.

Imbuing the joyousness of animated nature, the still unwearied guests fitted blither and blither. The pleasure within radiating from their beaming countenances, they commented on the good time they had had. Their expressions of appreciation as they thanked their host and hostess had a note of sincerity that was fully expressive of their true feelings of gratefulness, and in such sense, it was received with gracious cordiality by their kindly hostess and her charming daughter.

At this stage, the genial Joe LaTour, noticing the oversight of offering anything in the way of remuneration to the "fiddler," as he called him, for his services as musician, proposed to take up a collection. Acting on his own suggestion, he started around with his hat. "I think me," he would say as he approached groups of men, "meest, dat Musick is fiddler, he is de little money for play de nice music for de dance; his 'fiddle bit for mak' 'hem feel good; ah?"

When the LaTours had made his rounds of the men, he went up to the violinist and addressing him said: "Monseu, I don't know wat your nam' is, be, but all nam' I think, me, you dam' good fiddler. So, two, three, four of all de boy, me too, go round for collection for pay you for de nice 'musique you reeve for de dance. 'Tad you, monseu, I think you be de fiddler I beleave me, ah?" Thanking him for the contribution, he accepted it from the laudacious LaTour with amused gratitude, as he, in turn, complimented him on his dancing. The guests were now ready for the

start with their wagons well loaded, when there was proposed for the host and the hostess and daughter which was added to with a tiger. One of the convalescing admirers of Ronald's achievement in stealing the horses of the outlaws, proposed cheers for him also. This was taken up by all of them. With clamorous shouts they all then left, happy after their night's joyous pleasures.

Ronald assisted in putting the house in order after the guests had left. When this was done, he asked to be excused and retired to his room, leaving Sgt. Melvin chatting over the safety of the evening with the family.

### CHAPTER VI.

When Ronald retired to his room and the guests had departed, he did not do so with the intention of going to sleep. The idea of sleep had not occurred to him in his present state of mind. For, in a way, he now felt himself a stranger with no part in this family circle. His position and his relation with the family had undergone a radical change, and he felt as though he was an intruder on the privacy of the home by remaining in it longer. In addition to his feeling of isolation, he was conscious of the fact that his thoughts and work out his plans for the future. That afternoon he had been seriously considering a proposition made to him by Mr. Fraser, of taking up a homestead and going into the ranching business, partly on shares with his present host. They had the five horses captured from the outlaws, which, Mr. Fraser insisted, he would share with the LaTours. With his own horse, he would give him an outfit of six horses with which to start on his trip. The result of this scheme was left in abeyance for the time being.

When he came to think of the chance remark of a stranger of Mary's betrothal to Sgt. Melvin, and his own position as a result of the news, had so changed his viewpoint with respect to the father's proposition, that he could no longer entertain it. He thought it would not be fair to himself, nor to the woman he loved, to remain in the house. It would only mean his own continued unhappiness, and, perhaps, her unhappiness. He felt that his own presence would penetrate any disguise he might adopt to conceal his love for her. He accordingly decided to make an early start for his intended destination in North Dakota, and to leave the name of his horse with Mr. Fraser, either to keep or dispose of, as he saw fit. He considered this the only course consistent with honor for him to follow to ensure the future happiness of both. But he decided to remain in the house until he could finish a large horse corral, which they had started to erect, and which would take two or three days longer to complete.

After spending two or three hours in his room he came downstairs, when he heard Mr. and Mrs. Fraser moving about the house. They were just sitting down to breakfast as he came down, and he joined them at the table. Neither Mary nor Sgt. Melvin were up yet. They had evidently decided to have a good morning's rest after the dance. Their plans thus suited his present mood, for he had no inclination to intrude on their company now. Mr. Fraser, who, by now, looked upon him in the light of a fixed member of the home, discussed plans and affairs with him with open candor. He seemed to take it as a foregone conclusion that Ronald was in accord with his proposition of going in with him. In the short time of their acquaintance he had taken a great liking to him and regarded him with considerable favor. Mrs. Fraser also was even more partial in her regard for him than was her husband. She had no son of her own, and always having felt in her heart what she thus considered a vacancy in her family, she seemed to look upon this stranger, to whom they owed so much, almost in the light of a son. She favored and approved of the thought of his becoming a permanent resident with them.

Ronald knew and appreciated the reasons in which he was held by both, and he anticipated how sadly disappointed they would both be on learning of his decision to leave within the week. Reluctant of causing them disappointment at the time, he decided to wait for a more favorable opportunity to announce his decision to Mr. Fraser himself, probably while at work during the day. His immediate anxiety was to leave the house before the sergeant or Mary came downstairs. He accordingly suggested to Mr. Fraser that they make an early start at the work so as to have the corral completed as soon as possible. This suggestion was readily acted upon by his host.

### THE SOLDIER'S OUTFIT—THE KIT

When you go on a journey you carry a suitcase, or you take a trunk, in which you place your belongings that you will need on the road.

When the soldier goes off to the war he has a bag in which he puts some of the things he cannot do without—things that are absolutely necessary.

First, it is wonderful when you come down to it, how many of the things we need, after all. Most of us are overburdened.

There is hardly a girl or boy that has not a whole lot of unused baggage lying around—old toys and books, old rags and hats.

When I left Vancouver to come to Toronto, I had a bundle in my back yard for a lot of stuff that I used to think I had to save up.

Houses are like that, too. I roomed once in a very beautiful home, but the drawing-room was so full of furniture that you could not turn around without getting a bump somewhere.

There are a lot of things in our homes and a lot of material in our lives, and a lot of stuff in our minds that is just like piles of old lumber in the fence corner, doing no good, or like a lot of old clothes in a cupboard, only gathering moths.

The soldier knows that, and he just carries around what he can use and the kit bag is where he keeps them. It is a very fine thing to be able to carry useful things around with us.

A useless girl or boy is usually in the road.

What is the good of a lot of clothes if you can't wear them? I saw a man on the vessel on which I once sailed to Australia who had seventeen suits of clothes, and their chief use was in keeping busy his cabin boy, who brushed them.

And what's the use of a lot of information in your mind if you can't use it? I do not know which is the worse, having too many things or having nothing useful in them.

I have read of a bee hive in California, away out on the face of a cliff, it is stored full, but all day long hundreds of bees swarm around the cave; and while men have put on leather suits, yet's life has ever been a struggle from that nest of useless sweetness.

But second: The kit bag has in it not merely things the soldier has to use daily use—socks, to keep his feet warm and dry; brushes to keep the dirt out of his hair; razors to keep his face smooth; soap to keep him clean—but he also stores away in it precious things, and they are useful too: Letters from home—what would he do without their messages of love? They say that the saddest sight in a camp was the disappointed face of a boy when the mail comes and there was nothing for him.

If you are a young person away from home and forget the old folks, that's a way your mother looks when you neglect to write.

"The tender words unspoken, The letters never sent, The long-forgotten messages, The wealth of love unspoken, For these some hearts are breaking, For these some loved ones wait;

So show them that you care for them, Before it is too late!"

There are books and photographs of those beloved, looked at first thing in the morning and last at night; and when the kit and all belongings are left in a store when the battle is on, those precious photos are taken out and hidden next the heart, under the tunic.

There, too, is the Testament, placed by loving hands when the outfit was packed; perhaps the mother gave her own to her boy when he left; and there is a smudge mark yet on the cover, where a tear dropped; that she tried to wipe away, but she let fall, but could not help it.

Many a boy valued that Testament, and after some of them were found, there lay in the pocket, with the pages glued together by the blood, and sometimes torn with a bullet mark, the gift of pious love.

## He Was In Pretty Bad Condition

So Says Saskatchewan Man Before He Used Dodd's Kidney Pills

Mr. J. St. Germain suffered from Rheumatism and found relief in Dodd's Kidney Pills. Lacrosse, Sask.—(Special).—"I feel glad to say that Dodd's Kidney Pills are the best I have ever used. I was in pretty bad condition before I took your pills. I was weak in the kidneys and in bad shape with rheumatism. At present, I am very well. I have recommended Dodd's Kidney Pills to my neighbors and they all claim that they are the best kidney remedy that can be bought. I only took four boxes and now I can work hard and always feel so good."

This statement comes from Mr. J. St. Germain, well-known resident of this place.

There is no reason why anyone should continue to suffer when Dodd's Kidney Pills can be obtained from druggists everywhere, or The Dodd's Medicine Co., Ltd., Toronto.

### Record Made Of Plants

Test Will Be Made Of Trees and Plants at Ottawa

The Canadian Horticultural Council with headquarters at Ottawa, reports that at a meeting held recently the Plant Registration Committee adopted for recording one variety each of the apple, the peach, the raspberry, the lily, and the fern. These are credited with possessing superior qualities and will be tested in the official trial grounds under the direction of the council with a view to their ultimate full registration.

## SAYS CRITICISM OF SENATE BASED ON IGNORANCE

Ottawa.—"Senate reformers," said Hon. R. Dandurand, government leader in the Senate, "had better await some concrete proposal from the Government." The Senate had under discussion at the time the Turfist resolution calling for reform of the Upper House by reduction in numbers.

Senator Dandurand said there were two criticisms of the Senate—the mode of appointment and the term of office. Sir John MacDonald had urged that the Senate should be sympathetic with the Government, but he believed that it would be better to have a critical second chamber, as the former would be too prone to simply affirm Government legislation. He had found that criticism of the Senate was based generally on ignorance of the work of that body. The Senate, every session, did much to modify and improve legislation, and his suggestions were generally accepted by the House of Commons. If economy was sought, a reduction in the number of Senators should be concurrent with a reduction in the Commons.

## Boost H. B. Road

Enthusiastic Gathering Is Held in Regina by Supporters of the Project

Regina.—Formation of a branch of the On-to-the-Bay Association of Canada in Regina, was decided upon following a mass meeting held in the city hall here.

Enthusiastic support was given to the movement at the mass meeting, when a resolution was passed unanimously and amid loud applause, urging upon the Dominion Government "the necessity for the immediate completion of the Hudson Bay Railway."

It was also decided to send the following wire to Robert Borden, leader of the Progressive party, and Hon. W. R. Motherwell, minister of agriculture, and member for Regina:—"Failure to proceed to the immediate completion of the Hudson Bay Railway to the interior will mean serious loss to the farmers of Western Canada."

## Yukon Dredge Sinks

Cause of Accident in Klondyke River Is Unknown

Dawson.—Dredge number four, operated by Burrall and Baird, Ltd., sank in 25 feet of water. The accident occurred in the Klondyke River between Bear and Hunker Creeks. The cause of the sinking is so far unknown. The dredge was in winter quarters and the crew were preparing it for the summer work. The dredge was built in 1912 at a cost of \$100,000. It had a capacity of 10,000 yards a day and at the time built was the largest in the world.

May Reassign Washington Post

Tokio.—Ambassador Hirota may be "permitted to resign" his Washington post shortly, Premier Matsui told newspapermen.

The Premier's statement was made to a gathering of representatives of the Japanese press after a Cabinet meeting at which he admitted the subject had been discussed. The statement was the result of insistent inquiry.

Plunged Over Wharf

Nelson.—Arthur Flow, fireman on the government tug Valhalla, was seated in his automobile on the Proctor Wharf with the engine running when the car suddenly started forward and went off the wharf into 30 feet of water. Flow came to the surface and was rescued.

New Vancouver Daily

## American Capital Interested In Alsak Sodium Deposits

New York.—A syndicate of American capitalists has taken an option on the sodium sulphate "lake" at Alsak, Sask., and has sent an expert to report upon the deposit. If the sodium sulphate is as pure as Canadian reports indicate it is, development work will be started early in 1925. Some 300,000 tons of sodium sulphate or Glauber's Salts are used annually in the United States and Canada. If the Alsak salt meets the specifications called for by the market, the present option holders anticipate no difficulty in selling their output. Most of the Glauber's Salts now used in industry is a synthetic product, a by-product of the manufacture of muriatic acid.

## Aliens Smuggled Into States

Alleged Traffic Across River Between Canada and Detroit

Detroit.—Hundreds of aliens, denied admission to the United States through legal channels, are "bootlegged" across the Detroit and St. Clair Rivers from Canada every night, declares F. L. Prentis, in charge of the 11th immigration district. He does not attempt to estimate the number smuggled across the line each year through Detroit, which is believed to be one of the principal centres for such activities. Several methods are used to "bootleg" aliens into the United States.

A known ring on the Canadian side transports aliens at from \$10 to \$25 a head across the river in small boats. These smugglers have recently become so bold that they carry on their operations in broad daylight. Other aliens effect an entrance by poising as American citizens when they arrive on the numerous ferry boats plying between Detroit and Canada. These ferries carry monthly 500,000 passengers.

## British Diplomat Dead

Sir Edward Goschen Was Ambassador At Berlin When War Started

London.—Sir Edward Goschen, the man to whom Chancellor Von Bethmann-Hollweg is reputed to have characterized the Belgian neutrality treaty as a "scrap of paper," died at his home here.

Sir Edward was a veteran of the British diplomatic service, which he entered in 1869, and at the outbreak of the war was British ambassador at Berlin, taking a prominent part in the negotiations there in which the German chancellor vainly tried to ensure Britain's neutrality in the impending conflict. It was at his final interview with Sir Edward that the chancellor's famous remark went into the British diplomatic records.

In 1893 Sir Edward was secretary of the British embassy in Washington, and the following year acted as chargé. Later he served as minister to Serbia and Denmark, and as ambassador to Austria-Hungary, going to Berlin in 1908. He was born in 1847, educated at Rugby and Oxford, and was created baronet in 1916.

## Saskatchewan Wheat Pool

Clean-up Day Has Been Set For June 10th

Regina.—June 10 has been definitely fixed as clean-up day for the Saskatchewan Wheat Pool. It was announced by L. C. Brouillette, secretary of the Saskatchewan Co-operative Wheat Producers, Limited.

Mr. Brouillette said it was expected they would be able to pass the 7,000,000-acre mark by the end of June.

"To do this we are 1,520,000 acres under contract," he said, "and we were able in one day last fall to sign up more than 2,000,000 acres."

"Very little change is going to be made in the organization of the co-operatives, but special organizers are being sent out to line up the districts, appoint key men, and give them full instructions as to what they will need to do in the big day."

## Will Discuss Bay Route

Moose Jaw.—The executive of the Associated Board of Trade of Saskatchewan will meet in Moose Jaw in July. The agenda to be discussed includes discussion of the Hudson's Bay Railway, and a buffalo reserve for Saskatchewan.

## Famous French Aviator

PELLETIER DOISY

better known as "Tivolo," who was recently promoted to the rank of captain in recognition of his record-breaking feat in hopping from Paris to Hongkong, in Indo-China, in 74 flying hours.

## London's Social Season

Splendor of Royal Court Held at Buckingham Palace

London.—London's social season of 1924, which is expected to be the busiest and most brilliant since the glorified days before the war, began with the real splendor of a royal court held by the King and Queen at Buckingham Palace.

As is the custom with the first court of the season, the guests, numbered 1,000, were drawn mainly from diplomatic and official circles, but there was also a small number from the general circle of society, among them several Canadian debutantes.

When all the invited thousands were assembled, the King and Queen, with their courtiers and royal kin, passed through the entire range of the state apartments, the court officials, with the white wands of office, preceding, with their faces to their sovereigns.

The procession ended in the ball room, where the King and Queen took their stand in front of twin thrones, on a low dais, with their family and court around them. As they appeared, bands within and without the palace struck up the national anthem, and then the dance of the diplomatic corps advanced and bowed, followed by all the guests, each advancing at his or her name, with bow or curtsy, repeating the obeisance when directly in front of the thrones, then for a third time before passing out.

## Thinks Europe Ready For State Of Peace

Italian Paper Bases Belief On Report Of Experts

Rome.—The two-day meeting at Milan between Premier Mussolini and Premier Theunis of Belgium, was productive of fruitful results, in the opinion of both the press and political observers here.

The Corriere d'Italia, the Fascist organ, which thinks that a meeting between the Italian premier and Premier MacDonald of Great Britain will occur soon, followed perhaps by one between Signor Mussolini and Edouard Herriot, prospective head of the new French Government, declares Europe is now ripe for a state of peace with the experts' report as a basis. Even this programme, however, will prove futile, it declares, if the Allies are not firm in their purpose to carry it out at once and completely.

## Should Improve Dairy Products

Canadian Dairy Commissioner Would Have Quality Brought to Highest

Ottawa.—"The solution is to bring the quality of Canadian cheese up to the highest point," said J. A. Ruddle, Canadian Dairy Commissioner, addressing the House Committee on Agriculture and Colonization.

New Zealand was now exporting more cheese than Canada, and if her export of butter continued at the present rate, she would soon be exporting more butter and cheese than any country in the world.

Mr. Ruddle had, however, never seen a New Zealand cheese with the fine flavor of the finest Canadian.

## British Empire Exhibition To Be Closed On Sundays

London.—If Sunday opening of the British Empire Exhibition is not allowed, fully ten million people will be unable to witness the big show, because they will not have the opportunity to do so on what is admitted to be Lord Stevenson, chairman of the standing committee. In view of the fact, however, that legislation would be necessary to legalize Sunday opening, and organized opposition to throwing the exhibition open to the public on Sundays would have to be counteracted, Lord Stevenson says the project seems impossible.

## Proposed Further Power Development

Power Company Ask Right to Store Water in Kootenay Lake

Nelson, B.C.—The West Kootenay Light and Power Co., has applied to the provincial water rights branch for the right to store 675,500 feet of water in Kootenay Lake. If the application is granted, it is the company's intention to dam the Kootenay River at Granite, submerging the Graham Rapids, and raising the lake water level at Nelson six feet. The company's number 2 plant at Upper Bonnington develops 30,000 horsepower, and the number one plant at Lower Bonnington, now under construction, will develop an equal amount. With the six foot lake storage proposed, each plant will have a capacity for the two plants of 110,000 horsepower. The constantly increasing requirements of the Consolidated Mining and Smelting Company of Canada for its Trail plants are the motives for the proposed further power development by the West Kootenay Company, which is a subsidiary of the Consolidated.

## Bandit Aided Recovery Of Cached Currency

Pleaded Guilty to Robbery and Was Given Suspended Sentence

Vancouver.—Smiling Johnny Reid, bank bandit, who had been sent up for trial by Magistrate Alexander, pleaded guilty to complicity in the robbery of the Royal Bank branch at Ladner, B.C., when \$128,000 in bonds and cash were stolen, and was given two years' suspended sentence. The robbery of the bank occurred March 28, 1922.

Reid was given a similar sentence in Lethbridge recently for being implicated in a bank robbery in that province. He has been responsible for the return of approximately \$900,000 in currency and bonds that were cached by bandit gangs of which he was a member and which worked in Canadian provinces and border states.

## League Investigating Reform Of Calendar

Committee Also Seeking to Find Fix Date For Easter

Paris.—The Academy of Sciences received the members of the special committee of the League of Nations appointed to investigate the possibility of a reform of the calendar.

The committee men are charged with the mission, which it is jokingly declared in some quarters would dash the hopes of old maids of abolishing leap years. To this question members of the committee smilingly declared that maids of any age should be able to propose on their own hook during any year.

The main object sought by the committee seems to be the fixing of a common fixed date for Easter, avoiding the present divergence between the Catholic and Greek Orthodox faiths, and then to examine into several ingenious plans for subdividing the years.

## Photos By Telegraph

New York.—A new and simplified method of transmitting pictures over long distance telephone line has been announced by the American Telegraph Company. By means of the process photographs were transmitted here from Cleveland in less than five minutes. Within 45 minutes after a picture was developed in the Ohio city, it was exhibited completely developed, to a group gathered here in one of the A.T. & T. offices.

## TAKES EXCEPTION TO STATEMENT ON IMMIGRATION

Ottawa.—Some remarks made by the Duke of Connaught in London upon immigration to Canada were called to the attention of the House of Commons by Frank Cahill (Liberal, Pontiac). The Duke said, among other things, that "we would like to have in Western Canada, English, Norwegian and Swedish people, who make the best immigrants." Mr. Cahill asked Hon. J. A. Robb, minister of immigration, if he "could find some method of informing the public men of England that immigration into Canada is a Canadian question, which should be settled by Canada."

Mr. Robb replied, in the first place, by stating that the Canadian Government was seeking to encourage British immigrants to come to Canada, and that preferential rates of fares had been arranged for this summer.

As to Mr. Cahill's remarks, he added, "I might, at the same time, inform some Canadians that it is the British Government's business to manage affairs in Britain."

## Volcano Gives Danger Signals

People in Hawaiian Islands Are Warned Of Disaster

San Francisco.—Nature's danger signals are flying over the smoky crest of Kilauea volcano in the Hawaiian Islands and greater loss of life may be averted if the warnings are heeded, in the view of Dr. T. A. Jaggar, noted volcanologist, here, before he sailed for Hawaii. Dr. Jaggar, who is director of the Hawaiian Observatory, has predicted for years that Kilauea would be in action in 1924. Since the present disturbances began he has been recalled to the islands.

"The eruption of Kilauea," he said, "portends more phenomena of this sort. The lava in Kilauea's crater had been subsiding for four years, and that is always a danger signal. I look for more violent activity. It equals the eruption of 1790, when hundreds of natives were killed."

Montreal Handles More Grain

Montreal.—Montreal's grain exports to date exceed those of last year at this time by over four million bushels, it was announced at the Harbor Commissioners' office. The total amount of grain handled locally from the opening of navigation to May 18, inclusive, was 12,829,536 bushels, as against 8,586,526 bushels during the corresponding period of last year.

Aviator Killed In Auto Crash

Melbourne.—Capt. Andrew Lang, former holder of the world's airplane altitude record, was killed when an automobile in which he was driving crashed into a fence in a dense fog. He was driving in a 74-hour test. He was a nephew of Andrew Lang, the British author.

Many War Claims

Ottawa.—Hon. Wm. Pugsley, commissioner on war claims, has heard appeals from 528 claimants, involving \$31,295,619 and there are still 622 claims to be heard, aggregating \$11,065,044. It was announced in the House.

Cabinet Ministers Have New Cars

Ottawa.—A return taken in the House states that 13 new automobiles have been purchased by Cabinet ministers since 1921 and are now in use by the ministers. The cost of the cars varies from three thousand to seven thousand dollars.

Sentenced to Death

Tonak.—Captain Sourat, a high officer in Admiral Kolchak's army, who headed punitive detachments at various periods and afterwards participated in a number of White Guard uprisings in the Far East, has been sentenced to death by a military tribunal.

C.N.R. Extensions

Winnipeg.—Tenders are being called for by the Canadian National Railway for a five-mile addition to the roundhouse at Nutana, Sask.; the extension and alteration of the station at Saskatoon; and the ditching on the Turnberry and Togo subdivisions.

The late Professor John Stuart Blackie was over seventy when he began to learn Greek.

## Announce Third Annual Tour to the Coast.

Special Train from Winnipeg.  
Stops Made at Various  
Points of Interest.

## PERSONALLY CONDUCTED.

This tour, which will be interesting to the holiday maker and of great educational value to the student and to the teacher, offers an unusual opportunity for seeing, under the most favorable conditions, the Canadian Rockies, including Jasper National Park, and the Pacific Coast.

The special train, operated in connection with this tour and consisting of modern sleeping car equipment, dining car and radio observation car, will leave Winnipeg July 24. After stopping at various points of interest, the train will arrive at Prince Rupert on July 7th. At this latter point, the party will embark on one of the palatial steamships of the Canadian National Pacific Coast service for a cruise of 550 miles through the famous "Inside Passage" to Vancouver. While the tour terminates at Vancouver, those who desire to make a trip to Victoria may have their tickets read "Victoria" as their destination without any additional cost.

The local agent of the Canadian National Railways will be pleased to give you full particulars of this tour, including the cost, choice of routes returning, etc.

## In Unhurried Quebec

"These 'chic' of Quebec have no Jackie Coogan to do them justice."

Old-fashioned Quebec tugs at the heartstrings of the summer visitor, because her appeal is personal. Without intention, so to do, she has struck what the advertising men work so hard to acquire—the human interest article.

Quebec is natural, simple, lovable. In our race for a living we of the cities have reduced life to a system with every action in subordination to hours and minutes. But in Quebec the habitant rises above the leash.

He has something in himself which holds him to old ways. To family life, to the farm, to the horse and hand-plough; to the scythe, to cows. Wives and daughters and boys of all ages lend a hand at everything. All the changes of the seasons fit in to the rhythm of life. And yet there seems to be no particular scheme, no hurry, none of that driven feeling. No friction.

And so when we get into Quebec we are sensible of a freedom of spirit. The shackles of "the drive" fall away as we come once more under the benison of the simple and the fundamental.

Here by the road are the wondrous crosses common in Old France and once in Old England. The Mower in the fields. The dogs drawing their little carts still hold the road.

And nothing is more humanly appealing than these dog-carts of the Quebec highway. The "Dog of Flanders" has won his way to publicity on the screen, but these "chic" of Quebec have had no Jackie Coogan to do them justice.

And yet what a part they play in the life of this great Province, far larger in extent than Flanders. How the dogs fill niches in the households. Jobs long ago eliminated from our scheme of life, are performed by the dog carts as a matter of course, in Quebec. Boys of the family break their hand in from babyhood, harness-olke, unharnessing, driving "le chien." The boy that as

soon as he is big enough will have the horses in hand. Deep meaning off lies hid in childish play down in Quebec.

And yet the dog cart is not merely a means toward an end. As farm life is arranged in Quebec, the dog cart is no mere child's toy, but part and parcel of French thrift.

Boys sent an errand cover the miles in the dog cart. Wood to be brought from the distant woodlot on the mountainside is loaded into the little cart. With the aid of these "tiny horses and carts" small boys do this work quite easily, releasing their fathers and big brothers to men's jobs at the plough or with the heavy scythe.

Textile workers in the big mill below Montmorency Falls, living in Saint-Gregoire and other villages nearby, have their dinner-pails brought to them by their small boys in dog-carts, and if they happen along this road at dinner-time it is to see perhaps as many as thirty or forty of these little chariots.

The speed attained of the dog is surprising, especially when homeward bound. Then, little Maiten can hardly hold him in.

But you must not think 'tis only youth that these gay dogs of Quebec serve, their tails wagging, firing along with the baby in the cart and the family brood of boys and girls running better skelter gathering fribbles in their pails. What would the old... the old couples, the old women, do without their old dog and his little cart?

But, I think perhaps one never realizes more, how much a part of every day life the dog cart is, until you happen along by some wayside smithy and see the smith hard at work turning, twisting, heating, hammering the miniature axes and files in the most matter-of-fact manner, part of the day's work, as much as shoeing a horse.—Victoria Hayward.

## Holborn U.F.A. Dance, on June 8, at Trautman Barn.

### Stony Plain and District.

Tuesday next is the 50th anniversary of the birth of His Majesty King George the Fifth.

The local footballers had a very good practice on the Fair Grounds Monday night. W. Robertson was a business visitor to the City on Tuesday.

Mrs. Stewart, from Detroit, is visiting here this week at the home of her parents, Mr. and Mrs. Ph. Miller.

The schedule of baseball games have been printed in convenient card form. Get yours at A. E. Michael's Hardware Store.

The Federal elevator and Gillespie elevator shipped several cars of grain last week; these shipments clearing out the elevators pretty well.

Johnny Miller reports the sale of Ford cars to the following: McCall and Noble of Edmonton; H. Gillies, Luc Ste Anne; Schiedeman, Meyer and Wright, Duffield; Walton, Fishenden and Goebel, Stony Plain.

Some of the trees in the Comet district are showing signs of a recurrence of the tent caterpillar pest.

Four young men, not members of the Rifle Club, are said to have taken several rifles and 1000 rounds of ammunition, on the holiday, from a house adjacent to the rifle range. The case was reported to the Police.

Capt. C. F. Found's Boy Scouts had a very energetic time on the holiday, which included a hike to Edmonton Beach, going out and returning in pairs. Each carried his day's rations in his haversack. All returned to town late in the evening after a day enjoyably spent.

The Marshall-Wells picnic at Edmonton Beach has been postponed till the middle of next month.

Up to the time the rain fell on Saturday, outcrops were reported as doing some damage to the growing grain crops in parts of the district south and west of town.

Rev. M. G. Newton, Duffield, is a delegate this week at the Methodist Conference in Calgary.

A big celebration will be held in Westlock on Tuesday next, the King's Birthday, and Banker Phil Fuhr is on the "Novelty Committee" whatever that is.

Dr. S. Hamilton, dentist, will be in Stony, Friday, the 13th June.

Mr. McLaren, who came up from Viking this spring to work Mr. Barrie's farm at Edmonton Beach, had the misfortune last week to lose two of his best purebred Ayrshire cows valued at \$200.00 apiece. The animals broke through their pasture fence and strayed onto the school section and became mired in a big slough there. The cattle drowned before their condition was discovered.

### Holborn News.

Undaunted by the loss of the lumber for their new hall by fire a few weeks ago, the members of Holborn U. F. A. Local are going right ahead as if nothing had happened. On Saturday last seen a very large turnout of those in the district, to help clear the site for the new hall donated by Mr. Kullander on the northeast corner of his farm. About two score were present, and some excellent work was executed. Time was called in the afternoon for lunch, and all hands did ample justice to the coffee, sandwiches and cake provided by the ladies; and the ice refreshments were not overlooked. Mr. Michael motor-d a large party down to the "bee"; but no one would lend the "large party" an ax to help, so he had to content himself by taking notes.

The new structure will be 70 x 26 ft., with a 10 x 12 ft. room on each side of the main entrance, and a 10 foot stage at the farther end.

A drive shed will be built on the west end of the lot, and it is the intention to have a layout for a skating rink when the cold weather comes.

Owing to sickness, the dance billed for the Miesner barn tomorrow evening has been cancelled, and this dance will be combined with the one on Friday June 13th, at the Bill Trautman barn, at Holborn, and it will be held under the auspices of the Holborn U. F. A. Local. Good music will be furnished, and a good crowd should be in attendance.

Strayed onto my place on Friday May 23, one red sow, about 1 year old. Apply A. Kube, NW 1511 W5.

### Women's Institute

On Wed. May 14 fourteen members of the local W. I. met at the home of Mrs. J. F. Clarke. A millinery demonstration will be held June 6, 7, 9, in Ducholke's Hall, at 2.30 to 5.30 and 8 to 10 p.m. Particulars regarding materials, etc., can be had by applying to the secretary.

After the business, Mrs. J. F. Clarke gave an excellent demonstration on the "Making of Salads," followed by delicious refreshments.

The meeting adjourned to June 10.

Route Cards printed at The Sun Office.

LOST—Glasses, heavy celluloid frame; lost May 16th, near the Schoolhouse in Stony. Reward on return to C. F. Found's, Bank of Commerce. 99

LOST—2 year old light sorrel Belgian filly, white face, no brand. Notify Louis Goebel, phone R1108, Stony Plain P.O. 200

### R. BREITKREUTZ

TIRE REPAIR SHOP, STONY PLAIN.

GET YOUR TIRES REPAIRED AND SAVE MONEY.

OPEN SATURDAY EVENINGS. AT THE TIN SHOP.

### Here and There

Shipments of grain from Vancouver for the 1923-24 season have now passed the 41,000,000 bushel mark. Officials estimate that the 50,000,000 bushel mark set for the season will be surpassed in the near future.

Reports from England state that it has been universally conceded that Canada's pavilion was in the best condition when the King opened the British Empire Exhibition at Wembley on April 23rd. It was the Canadian building, the reports said, "spick and span and complete to the last nail that led all others in the race to the finish in time for to-day's official opening."

Over 3,000 settlers left Liverpool for Canada on April 24th. Thirteen hundred of these sailed on the Canadian Pacific liner "Montcalm," including a party of 200 skilled workers from Manchester, 33 belonging to engineering trades, 40 to building trades and 42 farm hands. Eighty skilled workers from Leeds and a party of engineers from Barrow-in-Furness were also on board.

A total of 40,000,000 salmon trout eggs has been collected during the last season by the Department of Marine and Fisheries in Lake Huron, Georgian Bay and Lake Superior. The total number obtained compares favorably with the average collections of recent years and is sufficient to fill about 100 hatcheries on the Great Lakes engaged in the propagation of salmon trout.

Graphic and interesting educational motion pictures will bring Alberta's various resources to the eyes of those who attend the British Empire Exhibition this year. In addition to pictures illustrating the life of Alberta's citizens on the farms, on the ranches and in the mining districts, charts will be used to bring out interesting comparative statistics illustrative of the province's agricultural and industrial output.

Carrying an invitation to the President of the United States to attend the celebrations of the 140th anniversary of the settlement of Upper Canada by the United Empire Loyalists, which will be held in June, Miss G. Lamer, herself a descendant of the original settlers, Belleville recently on horseback rode to Washington alone, a distance of 600 miles, to make arrangements for the celebrations are being made and it is expected that thousands of visitors will attend.

An attractive booklet entitled, "A Week in Quebec," written by Betty Thornley, internationally known writer associated with "Vogue" and other magazines, has just been added to the series of artistic pamphlets published by the Canadian Pacific Railway. It describes the Ancient Capital and its environs, is illustrated by many striking photographs and bound in a cover which reproduces in natural colors the pattern of cloth called catalogue, woven by Quebec habillat women.

That the Indian village of Hochelaga, which stood on the site of the present city of Montreal, was a place of about fifty wooden houses having a population of some 4,000 souls when Jacques Cartier sailed up the St. Lawrence, the assertion made by Dr. D. L. Lighthall before the Antiquarian and Numismatic Society of Montreal recently. Dr. Lighthall was able to give the boundaries of the village and described it as resembling the town of Cordic the Saxon, in "Ivanhoe."

Appropos of the recent "Save the Forest Week," E. W. Beatty, President of the Canadian Pacific Railway, stated: "A forest week's concentration on saving the forests of Canada is well worth while—much better to make it a 'Forest Saving Year' and, if the forest resources of this country are to be conserved to adequately avail the greater Canada of a few years hence it must be a 'Forest Saving Generation.' Forest wastage is today tragically too great and we Canadians must say and are paying for the loss."
